Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

On April 19, 2006, The Board of Patent Appeals and Interferences affirmed the Final Rejection against independent claims 1-5 and 7-18, (Byrne in view of Mitchell) and reversed all rejections against claims 1,2,4-7,10,12-15,19 and 20 (in view of Mitchell). Since there are no allowed claims in the application, only claims 1,6,19 and 20 remain pending.

The Board cited Cole 3,646,244 as relevant analogous art. Below is an action on merits based on Cole and Byrne.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,6,19 and 20 are rejected under 35 U.S.C. 103 (a) as being as being unpatentable over Cole 3,646,244 in view of Byrne. Regarding claims 1 and 19, Cole discloses a floor having a top surface 34 and an opening defined in said top surface; a receptacle unit 10 mounted in said opening in said top surface; said receptacle unit 10 comprising a top 22 and at least one sidewall extending downwardly from said top, said at least one sidewall having at least one receptacle 19 defined therein; means for selectively displacing said receptacle unit between a retracted position in which said top of said receptacle unit is planar with said top surface of said floor (see figs. 2 and 4), and an extended position in which said at least one receptacle in said at least one

sidewall of said receptacle unit is elevated above the top surface of said floor (see figs. 3 & 4); and a housing 46 mounted to an underside of said top surface of said floor, said housing having an open top and being aligned with said opening defined in said top surface of said floor so as to receive said receptacle unit in said housing when said receptacle unit is in said retracted position. Cole does not disclose the receptacle being mounted in an article of furniture. However, mounting receptacles in articles of furniture is well known in the art as evidenced by Byrne. Byrne discloses a retractable receptacle 150 with sidewalls (front side of box 152) mounted in an opening in a top surface of an article of furniture 104. Therefore, it would have been obvious to one of ordinary skill in the art to use the receptacle in an article of furniture for providing conveniently located electrical power source receptacles in/on a work surface such as a desk top or similar article of furniture as taught by Byrne.

Regarding claim 6, the receptacle unit of Cole further includes means for biasing and locking 45a,45b.

Regarding claim 20, said housing 46 includes means 64 for coupling said receptacle unit to an external power source.
